

MISSION

Contributing to improve the quality of health education in Turkey and thus to contribute to enhance the quality of health professionals and growing the social welfare by making accreditation, evaluation and information studies for training programs in different disciplines in the field of Health Sciences

VISION

To include the accreditation, evaluation and monitoring processes of education programs in different disciplines in the field of Health Sciences into international education accreditation processes.

GOALS

1. Evaluating and accrediting Health Sciences education programs upon the application of institutions
2. Continuously monitoring the current and future needs of the stakeholders of Health Sciences programs
3. Organizing meetings such as national and international courses, seminars, conferences, panels, workshops etc. and supporting the other activities within this scope
4. Communicating, cooperating, conducting joint projects, helping each other with national and international associations, professional organizations and accreditation bodies related to education, evaluation and accreditation
5. To prepare the accreditation processes of Health Sciences education programs and the sustainable infrastructure for graduate programs
6. To adapt Health Sciences accreditation processes to national and international external quality assessment processes
